SRINIVASA RAO KAGITHA

Lead Engineer | WLAN & Bluetooth Testing | Python & Automation Expert | 6+ Years Experience

+918309895383 skagitha30@gmail.com https://github.com/srinivasaraoka/ Bangalore

EXPERIENCE

Lead Engineer

HCL Technologies

04/2024 - till date Bangalore, India

- Team Size 10
- Executing the Signaling and Non-signaling tests, Active scan, Band edge and Harmonics measurements for all Wireless products
- Analyzed data throughput and rates across different channel conditions while sys tematically adjusting range using advanced attenuator technology; insights gaine d led to the optimization of performance for 5 distinct radio channels.
- Experience in both Manual & Automation execution of Wi-Fi /BT/ZigBee test cases
- Conducted bench testing and debugging of WLAN solutions through manual test case execution
- Worked on modifying and updating the Python code for test flow changes
- Bringing up the setups/any changes for testing/Validation, performed the power table validation
- Mentor for team members, Training the new members in team and mentoring the trainees.

Engineer 2

Qualcomm

07/2021 - 02/2024 Hyderabad

- Team Size: 10
- Conducted Python automation on WLAN mobile chipsets (HMT, HSP, HAMILTON)
- Throughput understanding of 802.11 a/b/g/n/ac protocols
- Working on security WEP/WPA/WPA2/WPA3
- Executed Python automation scripts to streamline NFC-specific manual test cases, achieving a reduction in testing time by 50 hours per month while enhancing overall accuracy and reliability during product evaluations.
- Experience in ADB debugging, logging and meta flashing on different ADB devices
- Working on firmware validation, different tags reading and card emulation on NFC chips on different Android devices

Senior Validation

Cypress Semiconductors

07/2018 - 07/2021 Bangalore

- Executing A2DP, HFP, AVRCP and PBAP tests between DUT and Reference phones
- Debugging different Bluetooth profiles' sanity and functionality issues before raising bugs
- Sanity testing, Functionality testing, Stress testing and Customer reported issue analysis on multiple customer mobile phones
- Good understanding of IEEE 802.11a/b/g/n standard protocols
- Experience in analysing and debugging problems using WLAN sniffer tools like Wireshark
- Experience with tools like Iperf for measuring link performance and quality

EDUCATION

B.Tech(ECE)

From Jawaharlal Nehru Technological University Kakinada

01/2018 - 01/2018 Vijayavāda, India

Diploma (ECE)

From Jawaharlal Nehru Technological University Kakinada

01/2015 - 01/2015 Machilīpatnam, India

SUMMARY

6+ years of experience in Radio Frequency (WLAN), Bluetooth, and NFC engineering domains, with a strong understanding of IEEE 802.11 b/a/g/n/ac. Skilled in developing and executing scripts using test frameworks like pyATS and pytest. Developed Python automation for rerunning iPerf on mobile targets. Contributed to the testing and validation of WLAN chipsets to ensure compliance with IEEE standards and performance requirements. Expertise in Wi-Fi carrier sensing, Wi-Fi scanning, and frame exchange between stations and APs. Experienced in running iPerf traffic on SoftAP, P2P, and TDLS. Knowledgeable in Dynamic Frequency Selection (DFS) testing and operation.

KEY ACHIEVEMENTS

Automation Testing Implementation
Implemented automation testing, reducing manual effort by 40% and improving efficiency.

WLAN Throughput Enhancement
Increased WLAN throughput performance by 25% through optimized test procedures.

Successful Team Leadership
Led a team of 10 in successful project delivery with zero delays.

Bluetooth Issue Resolution
Resolved 35+ complex Bluetooth issues, enhancing product reliability.

Certifications:

Completed the certification in Python from Python Institute(pcap), Hackerrank, SoloLearn

Completed the certification on WiFi from CWNP, Candela technologies and Mist Systems.

SKILLS

Wi-Fi **Bluetooth** **GitHub**

IEEE **JIRA** **Linux** **Manual Testing**

NFC **Pytest** **Python** **C**
